

COVID19 Response

Screening Expectations for all Construction Sites

Standard Operating Procedure

V2 May 11, 2020

Objective

Ensure that effective and consistent measures are in place to screen the health status of all trades, sub-contractors, and service providers which enter a PSR West Coast Builders Construction site

Guideline Overview

Update 5/11/20- All personnel entering PSR job sites are required to wear a mask or cloth face covering. Covering should fit snugly and cover mouth and nose, allowing for breathing without restriction.

Given that the WHO, CDC, and other global organizations have now identified the coronavirus outbreak as a pandemic, and have determined that body temperature is one key indicator of COVID-19 infection, we are requesting that all staff and workers are asked to take their temperatures each day before coming onsite. This policy is applicable for all Workers on a PSR job site under active construction, whether external support or internal employees for the General Contractor.

One point of entry is to be designated for site check in. A single staffed check in point must be provided to ensure the protocol is effectively maintained, and all trades and visitors are held accountable.

Self-Assessment is to be reviewed and documented daily by all persons on site. Page 2 of this document should be provided for reference at check in station. Printed name and signature are required for acknowledgement on the daily site log. Copies can be made as needed of the daily site log (page 3).

These are the minimum expectations expected for site management. Sub-Contractors are welcome and encouraged to implement and manage additional measures on site that exceed the base expectation.

Delivery Protocol

- Cleaning protocols must be increased in delivery areas
- Delivery of small boxes or mail
These types of deliveries are short in duration, and do not require close contact. Social distancing (separation of 6 feet) should always be maintained.
- Large Supplies or shipments-
For deliveries of larger materials, suppliers may need to enter the site. Entry into buildings should be minimized where possible. The following guidelines apply:
 - Delivery personnel must disclose if they feel unwell. In unwell, they are not allowed to enter the site.
 - Site employees and delivery personnel shall maintain social distancing, keeping 6 feet distance from other parties.
 - Drivers should remain in their vehicles whenever possible

PSR West Coast Builders Self-Assessment Criteria COVID19 Construction Site Entry- Daily Log

One point of entry is to be designated for site check in. A single staffed check in point must be provided by PSR to ensure the protocol is effectively maintained, and all trades and visitors are held accountable. Self-Assessment criteria is to be reviewed and acknowledged daily by all persons on site.

1. Has the employee, vendor, contractor, salesperson, or visitor (or a member of their household) traveled internationally, or on a cruise within the last 14 days?

If yes, we are directing you to remain off site in accordance with local jurisdictional requirements for COVID19 response. In absence of guidelines from local jurisdictional authority, PSR West Coast Builders policy requires that you remain off site for 14 days- starting with the day that you are the household member returned from travel.

2. Has the employee, vendor, contractor, salesperson, or visitor (or a member of their household) been in close contact* with a person who has been diagnosed with COVID19 (by testing or doctor's diagnosis)?

**Close contact is defined as being within 6 feet of the infected individual for 30 minutes or more.*

If yes, we are directing you to remain offsite for 14 days from when you last had contact. Local jurisdictional and regulatory requirements must be followed and may exceed this requirement.

3. Has the employee, vendor, contractor, salesperson, or visitor become infected by the 2019-nCoV Respiratory Disease?

If yes, you must remain offsite until free from fever (38°C/ 100.4°F or greater using an oral thermometer), signs of fever, and any other symptoms for at least 72 hours, without fever reducing or other symptom-reducing medicines (e.g. cough suppressants) AND at least 7 days have passed since symptoms first appeared.

All persons that do not meet the criteria above must conduct the following self-assessment before coming to work each day:

Do you have?

- FEVER (greater than 38°C/ 100.4°F)
- SIGNS OR SYMPTOMS OF RESPIRATORY OR FLU-LIKE ILLNESS

If yes to either, you must remain offsite until free from fever (38°C/ 100.4°F or greater using an oral thermometer), signs of fever, and any other symptoms for at least 72 hours, without fever reducing or other symptom-reducing medicines (e.g. cough suppressants) AND at least 7 days have passed since symptoms first appeared.
